

Acuity Target Safety Assessments (TSAs)

Knowledge is Power

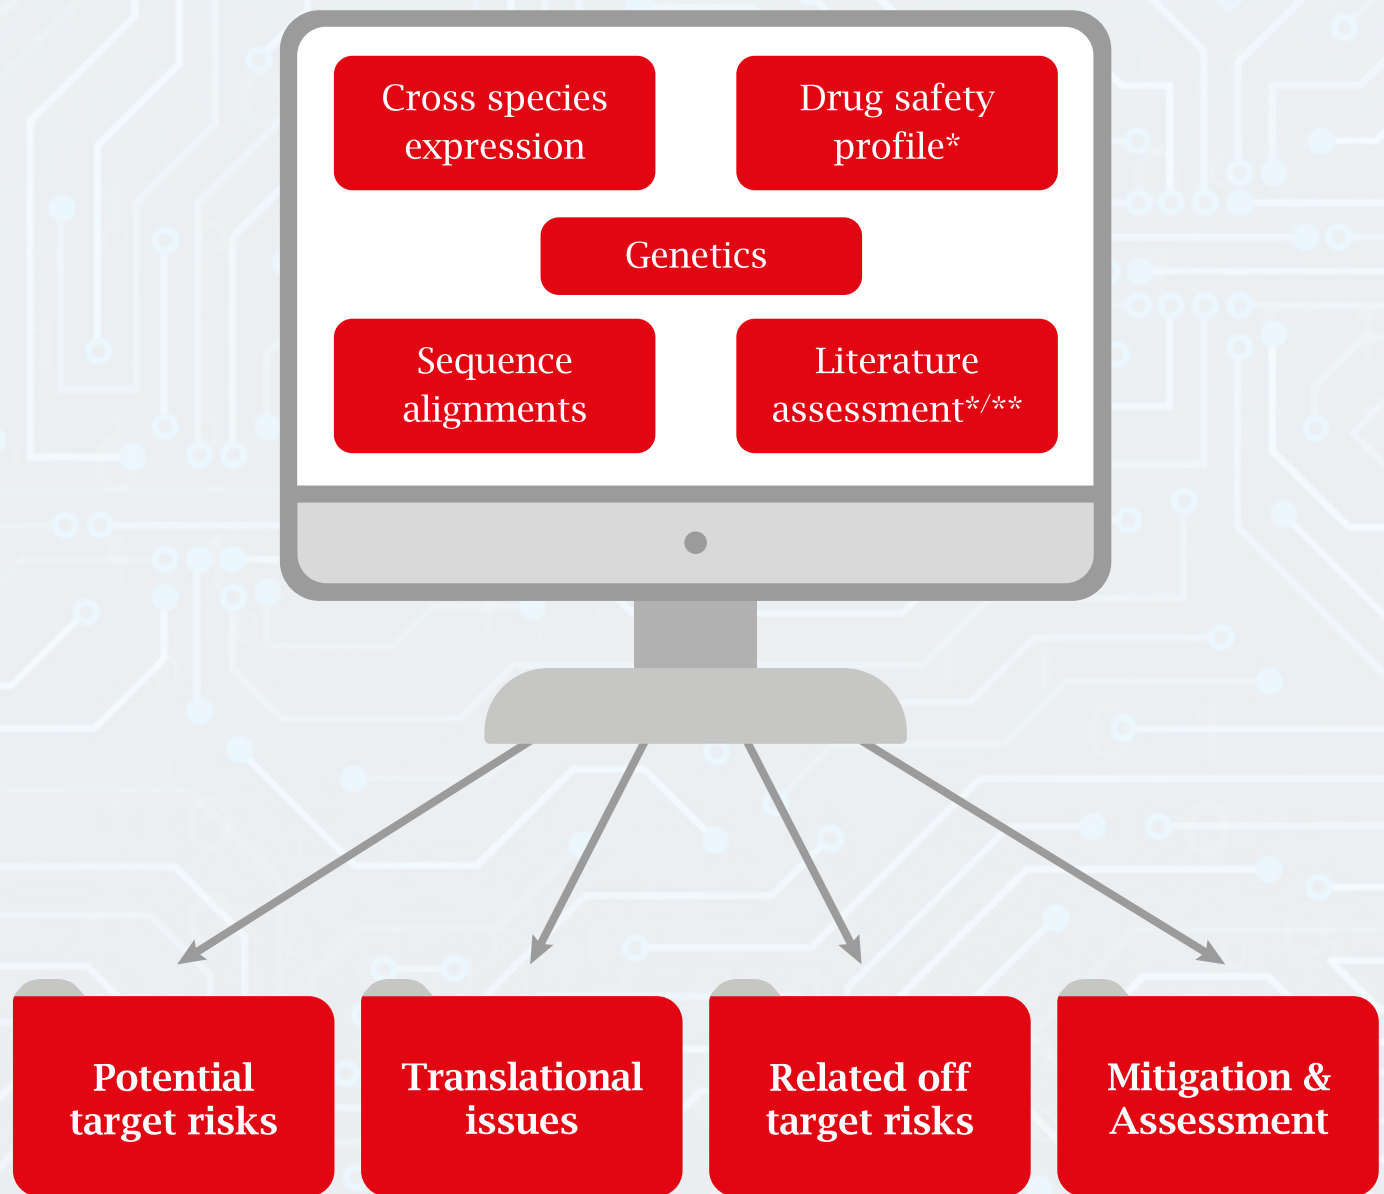

Concise and customised target, modality, or
asset focused reports

acuity
Expert-driven - AI-enabled

**“This is a terrific report - very detailed
and clearly explained, and I’m sure it
will be helpful for decision making.”**

Dr Catherine D. Strader,
Synergy Partners

**Interpreted by expert toxicologists
supported by state of the art informatics**

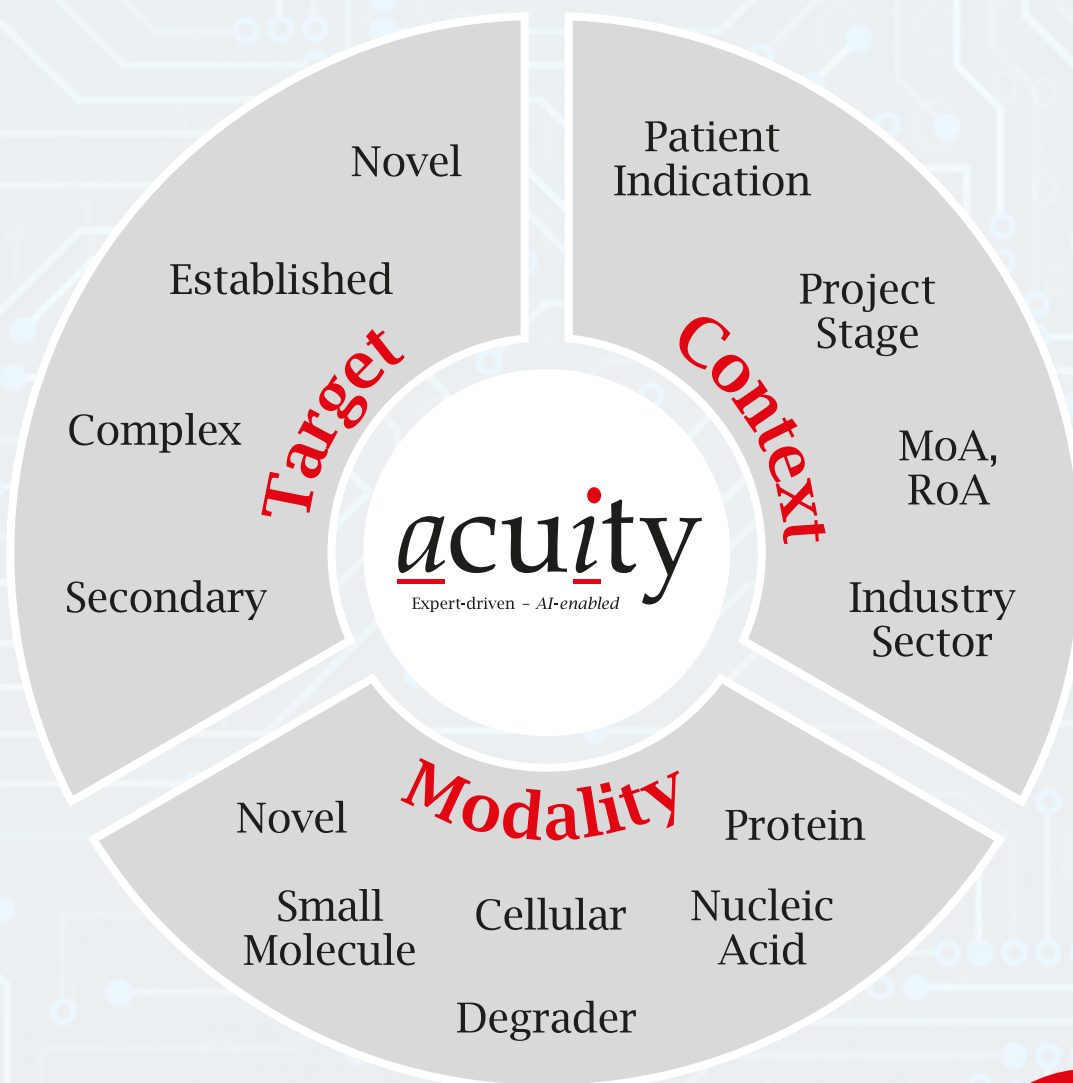

**A systematic search scaled to the project,
built on extensive toxicology experience and
advanced informatics.**

*open and licensed platforms searched

**AI supported full text mining

A tailored evidence-based report to guide better decision making

50 tissue
multi-species
analysis

12 organ
systems
reported

Experience
of 100s of
targets

Modality-specific
protocols

**“With many thanks - this target
safety assessment was exactly what we
needed and we are very pleased with the
quality of the work that went into this.”**

Head of Translational Science,
UK Biotech Company

From key risks to a complete risk assessment

Customised reports including:

Mini TSA

Comprehensive TSA

Modality and asset focused reports

**Consultancy support in predictive safety,
mechanistic and investigative toxicology,
and bioinformatics**

A target safety assessment (TSA) is an integrated, evidence-based report that identifies potential risks associated with modulating a biological target.
