A Patient First Approach to  
Translational Safety.  
From Nonclinical to Clinical

Wellcome Collection, 183 Euston Road, London

**October 17th 2024**

9am - 5pm

The programme is beginning to take shape:

| Time              | Title                                                                                                                              | Speaker                                   |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------|
| 9:00 - 9:45       | Arrival and Registration - Coffee and Pastries                                                                                     |                                           |
| 9:45 - 10:00      | Introduction                                                                                                                       | Dr Richard Knight, Apconix                |
| Opening Keynote   |                                                                                                                                    |                                           |
| 10:00 - 10:30     | Translational Safety [Medicines] by Examples                                                                                       | Dr Steffen Ernst, Apconix                 |
| Morning Session   |                                                                                                                                    |                                           |
| 10:30 - 11:00     | Translational Safety - from Strategy to Implementation                                                                             | Dr Peter Schulz, Explic8                  |
| 11:00 - 11:30     | Designing Preclinical Packages to Support Risk Assessment for Reproduction                                                         | Dr Jane Stewart, Apconix                  |
| 11:30 - 12:00     | Nonclinical Prediction & Evaluation Strategies to Minimize Drug-induced Liver Injuries                                             | Dr Dominic Williams, AstraZeneca          |
| 12:00 - 13:00     | Lunch Break                                                                                                                        |                                           |
| Afternoon Session |                                                                                                                                    |                                           |
| 13:00 - 13:30     | Understanding Cereblon Neosustrate Safety: a Key Approach for De-risking Targeted Protein Degraders                                | Dr James Sidway, Apconix                  |
| 13:30 - 14:00     | Making Decisions in the Face of Complex Data: a Carcinogenicity Assessment Case Study                                              | Dr Adrian Fowkes, Lhasa Limited           |
| 14:00 - 14:30     | Benefits of Early Screening for Detection of Seizure Liability: Utility of In Vitro Assays for Problem Solving and Decision Making | Dr Kimberly Rockley, Apconix              |
| 14:30 - 15:00     | Coffee/Tea                                                                                                                         |                                           |
| 15:00 - 15:30     | Nonclinical Approaches Providing Improved Translational Safety for Inhaled Products                                                | Professor Victoria Hutter, ImmuONE        |
| 15:30 - 16:00     | TBC                                                                                                                                | David Jones, Apconix                      |
| 16:00 - 16:30     | Ask the Experts Q&A<br>Chair: Dr Steffen Ernst                                                                                     | Dr Jane Stewart<br>Dr Peter Schulz<br>TBC |
| 16:30             | Close                                                                                                                              |                                           |
